

Inserting a new easy slider in a wordpress page

- › Log in to your dashboard, and click on pages
- › Create the page in which the slider will be inserted, if it doesn't exist yet
- › Publish the page or save it as a draft
- › Click on ImageSlider in the menu on the left
- › Click on Add New Slider
- › Name the slider representatively for the page in which it will be published
- › Click on Add Images
- › Select the images you want to add, holding the CTRL key on your keyboard for selecting multiple images at once
- › Click on insert images
- › Name the images representatively for what actually is in the pictures
- › Click on SaveSlider or Update in the upper-right side
- › Go back to editing the page you want the slider inserted into
- › Click on the EasySlider lite button
- › Select the slider from the list
- › Click on insert shortcode
- › Save the page by clicking update or publish.
